## MEMORANDUM

**Water Department**

**DATE:** March 14, 2022

**TO:** Zach Walker, City Manager

**THROUGH:** Adam Norris, Deputy City Manager

**FROM:** Dan Montgomery, Water Systems Director

**SUBJECT:** Salisbury Rd. Main Replacement Project

---

It is my recommendation that the bid submitted by Pyramid Excavation & Construction, Inc. for a main replacement project along Salisbury Rd. be accepted in the amount of \$995,300.00.

The existing 6-inch and 8-inch cast iron water main along Salisbury Road was installed between 1951 and 1957. This main has had 9 breaks in the last 10 years resulting in thousands of dollars in repair costs and site restorations. The existing water main is close to the pavement of Salisbury Road. The Water Department is proposing to install a new 8-inch ductile iron main along Salisbury Road outside of the paved roadway. This project was previously put through the bid process and was not awarded due to the received bids being higher than expected. The scope of the project was reduced and has now been rebid.

The project was bid on the e-procurement website, Public Purchase that the city uses for solicitations. Invitation to Bid #22011 closed on March 2, 2022, with 181 firms being notified and 34 firms downloaded the invitation to bid. All bids were reviewed by Department staff and it was determined that Pyramid Excavation & Construction submitted the lowest and best bid for this project. Pyramid Excavation & Construction has successfully completed projects for the Independence Water Department in the past, with the most recent project being completed for the Department in 2021.

The Capital Project is budgeted in account 7040-5406-402011-C on page 162 of the 2020/2021 budget in the amount of \$550,900. A budget transfer in the amount of \$543,930.00 from Account No. 7040-5406-9749-C to Account No. 7040-5406-402011-C will be made to cover the contract costs. The budget transfer will be included in the next quarterly budget amendment.
