Features and Benefits

Standard Equipment and Features & Benefits related to this product are subject to change without notice

Compact

The 3CX Compact is designed for big performance in small spaces, making it perfect for confined and urban job sites. The 3CX Compact is 35% smaller than the standard backhoe.

Versatility

The 3CX Compact easily handles a wide range of backhoe loader attachments or high-powered skid steer loader attachments.

Cab Comfort

A spacious cab with excavator controls makes the 3CX Compact easy to use and control and the optimized seat position makes it comfortable to operate for extended periods.

History

JCB has been the market leader globally for the last 13 years. Backhoes are 50% of EVERYTHING JCB makes. More backhoe loader sales means more consumer feedback and therefore, more resources to improve.

Maneuverability

The 3CX Compact is the ultimate in maneuverability; a tight turning circle and switchable steering modes permit work within a single road lane for minimal disruption and maximum productivity.
