

The police department does not recommend that this establishment obtain a city liquor license. During a youth alcohol compliance check [in 2021](#), this location sold a tobacco product to minor and had drug paraphernalia for sale. Again [in 2022](#), this location sold another tobacco product to an FDA minor during a separate compliance check. The police department feels this location fails to see the importance of age restricted products and this would jeopardize the lives of the youth in the area. This store also currently has numerous cigarette ads covering the windows, which is a safety concern and the store is unkempt with possible health code violations.
